

MSAIHack Challenges

Build from these challenges. You are allowed to come up with a new solution but it needs to have intelligence onto it.

AI Literacy for Marginalised Communities

How do we enable AI for everyone?

Building solutions to make it easier to learn and use AI for the development needs of people in marginalised communities.

Better living environment

Make use of Geo / Spatial Data

How can AI be used to protect and map the best needs for vulnerable resources in the environment to enable a better living society?

Cultural migration and evolution

How can I help preserve local cultures (language, food, customs, etc.)?

Make use of AI to map, predict, and protect different cultures in South Africa.

Building the Street Economy

Think Augmented Reality in the streets too

Make use of AI to build a solution that will help enhance the street economy as a mechanism to help foster better income.

Disaster forecasting and management

Let communities know and prepare better

Proactive caution and planning, and the role of AI - what will you build?
